### Abstract of **DE19809074**

The upper support point of the mounting arrangement has bearing rings (7,8) directly resting upon support components (11,12). At least one bearing ring is centred on the support components' axially facing lips (29,30) extending on the inner side. The support components are manufactured from different materials, one being steel plate and the other plastic. The bearing rings are manufactured from wire.
